DETAILED ACTION

Page 2

Election/Restrictions

- 1. Claims 6-10 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on 2/15/07.
- 2. Claims 11-29 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected method, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 2/15/07.

Claim Rejections - 35 USC § 102/103

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 1-5 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hobson et al., U.S. Pat. No. 5,445,906.

Application/Control Number: 10/815,151

Art Unit: 1745

Rejection of claims 1-5 drawn to an energy device.

Hobson et al., teach an energy device comprising a winding body in which a band-shaped laminate (abstract) having a flexible elongated substrate, a positive collector, a solid electrolyte, a negative active material, and a negative collector in this order is wound in a plate shape with the flexible elongated substrate placed inside (col. 3, lines 37-67). The energy device according to claim 1, wherein the flexible elongated substrate is made of an insulating material (col. 6, lines 13-16). The energy device according to claim 1, further comprising a negative active material between the negative collector and the solid electrolyte (col. 3, lines 56-68). The energy device according to claim 3, wherein a thickness of the positive active material is smaller than that of the negative active material (Fig. 8, ref. 84 anode, ref. 80 cathode). The energy device according to claim 1, wherein a minimum radius of an outer surface of the flexible elongated substrate is in a range of 5 times to 100 times a thickness of the band-shaped laminate excluding the flexible elongated substrate (col. 7, lines 27-59).

Thus, the claims are anticipated.

However, if the claims are not anticipated, in the alternative, they are obvious because although Hobson et al., teach the layers in opposite order of the application, because it is well-known in the art to provide a centrally-located anode, as evidenced by Yamaura et al., U.S. Pat. No. 6,658,498. In the application of a centrally-located anode, the thickness of the anode would be smaller than the cathode.

Art Unit: 1745

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Angela J. Martin whose telephone number is 571-272-1288. The examiner can normally be reached on Monday-Friday from 9:00 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan can be reached on 571-272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
